

HSBC Global Liquidity Funds Plc

HSBC Euro Liquidity Fund

Marketing communication | Monthly report February 28 2026 | Share class C

Investment objective

The Fund aims to provide security of capital, daily liquidity and a return that is similar to Euro money markets.

Investment strategy

The Fund is actively managed. The Fund will invest in a diversified portfolio of short-term securities, instruments and obligations. These instruments will be short-term fixed or floating-rate securities that mature in 397 days or less. They will be issued by companies, governments and government-related entities and either listed or traded on a Recognised Market. The Fund's investments will, at the time of purchase, have a credit rating of least A-1 or P-1 (or its equivalent) from a recognised credit rating agency, such as Standard & Poor's or Moody's. The Fund can invest in a range of short-term securities, instruments and obligations such as certificates of deposit; medium term, variable and floating rate notes; commercial paper; bankers acceptances; government bonds, corporate bonds, treasury bills and Eurobonds; asset backed securities and reverse repurchase agreements. The Fund's liquidity is daily – meaning investors can redeem their investment on any business day. The Fund is classified as a Low Volatility NAV Money Market Fund under the European Union Money Market Fund Regulations. The Fund's primary currency exposure is to Euro. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's objective may not be achieved in adverse market conditions. During times of very low interest rates, the interest received by the Fund could be less than the costs of operating the Fund. The Fund is not a cash deposit account. While Money Market Funds aim to preserve capital, they are not guaranteed and are not covered by retail deposit schemes.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

HSBC Asset Management has based this material on information obtained from sources it believes to be reliable but which it has not independently verified. HSBC Asset Management and HSBC Group accept no responsibility as to its accuracy or completeness. The views expressed were held at the time of preparation and are subject to change without notice. Forecasts, projections or targets are indicative only and are not guaranteed in any way. HSBC Asset Management accepts no liability for any failure to meet such forecasts, projections or targets.

There is no assurance that a portfolio will achieve its investment objective or will work under all market conditions. The value of investments may go down as well as up and you may not get back the amount originally invested. Portfolios may be subject to certain additional risks, which should be considered carefully along with their investment objectives and fees. The fund portfolio will progressively invest in cash, sovereign bonds, money market instruments as the fund gets closer to the term date. The fund operates swing pricing to cover transaction costs and in the event of redemptions it also covers portfolio dilution. Investors in Distribution share classes should note that investments from Capital-Accumulation share classes could affect the overall portfolio return.
